01 / DECISION SUMMARY

Clarify the evidence. Then choose your next step.

This invented six-recording catalog has a consistent set of example receipts, a lower final quarter and a rights-document gap. Here is what the supplied example supports, and what it does not.

Catalog / reference	Statement window	Scope
Sample catalog / SYNTHETIC-001	January-December 2025	Masters · 6 recordings · EUR

01 **Resolve the split on Recording F.**

The example declaration mentions a collaborator, but no signed split document is included. Recording F contributes €720, or 6% of the supplied receipts. Ask for the agreement before describing the rights as transferable.

Synthetic evidence: track register DEMO-F; document inventory D3; receipt rows filtered to DEMO-F.

02 **Understand the smaller final quarter.**

October-December totals €2,700, against €3,300 for January-March: 18.2% lower. This is a statement-quarter comparison, not a forecast or proof of declining audience demand.

Synthetic evidence: statement rows DEMO-001-054 and DEMO-163-216.

03 **Prepare for questions about concentration.**

Recording A accounts for 40% of receipts; Platform A accounts for 60%. Explain the sources and context rather than assigning an unsupported risk score.

Synthetic evidence: all 216 rows, grouped separately by recording and platform.

What this report is not. SPACE is a potential music-rights buyer, not an independent adviser to the seller. A real report would reconcile supplied evidence, not authenticate it with its issuer, certify ownership or promise a sale. This sample has no real reviewer or verified documents.

02 / INCOME AND METHOD

€12,000 in the supplied year. Not a predicted sale price.

All figures are synthetic net receipts for the example payee's already-defined interest, after the example distributor deductions. No publishing income, unpaid balances or unallocated advances are modeled. Statement months are not necessarily usage months.

Jan 2025 / €1,200 — Dec 2025 / €850

Net receipts by statement month (EUR)

2025	Net receipts	Source rows
Jan	€1,200	001-018
Feb	€1,100	019-036
Mar	€1,000	037-054
Apr	€1,050	055-072
May	€950	073-090
Jun	€1,000	091-108
Jul	€1,000	109-126
Aug	€1,000	127-144
Sep	€1,000	145-162
Oct	€950	163-180
Nov	€900	181-198
Dec	€850	199-216
Total	**€12,000**	**001-216**

Recording breakdown (same 216 rows)

Recording	EUR	Share
Recording A	€4,800	40%
Recording B	€2,640	22%
Recording C	€1,680	14%
Recording D	€1,200	10%
Recording E	€960	8%
Recording F	€720	6%
Total	**€12,000**	**100%**

Platform breakdown (same 216 rows)

Platform	EUR	Share
Platform A	€7,200	60%
Platform B	€3,000	25%
Other platforms	€1,800	15%
Total	**€12,000**	**100%**

How the totals were checked

216 uniquely identified rows: 12 statement months × 6 recordings × 3 platform groups. Monthly, recording and platform totals each sum to €12,000. No missing months or adjustments are modeled. Source total and reconciliation difference: €12,000 and €0 respectively.

Method: sum integer EUR cents; no FX conversion. First-to-final quarter change = (€2,700 ÷ €3,300 - 1) × 100 = -18.2%. This is not a year-over-year comparison. The synthetic platform allocation is constant by construction, not a real finding about listener behavior.

03 / EVIDENCE AND DOCUMENTATION

What is present. What is still a question.

This inventory is entirely invented for demonstration. “Observed” means present in the hypothetical supplied set, not authenticated or legally verified. An actual report would cite the real private file and relevant page or rows.

Synthetic document inventory

Ref / evidence	Example status	Useful next action
D1 / Receipt export 216 rows; 12 months	Observed in sample	For a real review, retain original statements and reconcile the same scope.
D2 / Track register 6 recordings	Incomplete	Obtain Recording F's identifier. The other five placeholders are not valid ISRCs.
D3 / Recording F split	Declared; not supplied	Ask the collaborator for the signed agreement and confirmation of the rights it covers.
D4 / Distribution agreement	Not supplied	Ask an independent adviser to check restrictions, term and any transfer requirements.
D5 / Advance or lien status	Unknown	Request the relevant balance and release evidence if applicable. Do not assume zero.

Income is not ownership evidence.

A royalty statement can show a reported payment basis without proving that a person owns, controls or can transfer the rights. The customer's declaration remains a declaration until the relevant evidence is checked.

Masters are not publishing.

The sample covers only its defined recording receipts. Musical compositions and sound recordings are distinct works in the US Copyright Office reference. This does not resolve any particular country's ownership or transfer rules.

No readiness score. The important result is the specific unresolved item and what to do about it. Five identifiers being present does not make a catalog “83% sale-ready.” Neither a document count nor a synthetic status badge proves transferability.

Method reference: US Copyright Office, Circular 56A. Preparation resource: SPACE seller document checklist. These sources explain concepts; they do not verify this fictional catalog.

04 / SCENARIO AND NEXT STEPS

An assumption is useful. Only if it stays an assumption.

For illustration only, apply an arbitrary annual-income multiple of 4 to 50% of the already-defined interest represented by the synthetic receipts. Four is not a market benchmark, recommendation or offer multiple.

€12,000 / year × 4 assumed × 50% share = **€24,000**

Same arithmetic: €1,000 monthly average × 12 × 4 × 50%. No additional ownership haircut, extra year multiplier or predicted range. Taxes, transaction costs, balances, contract restrictions and payment conditions are excluded. The hypothetical figure is not net cash at closing.

Three actions before a transaction discussion

1. **Close the document gaps.** Request Recording F's identifier and signed split evidence. Ask the appropriate adviser about transfer restrictions and any outstanding obligations.
2. **Explain the income window.** Retain the original source files. Check reporting lag and context for the quarter difference; do not infer an audience trend from receipts alone.
3. **Choose the conversation you actually need.** Use the record with your own adviser or another buyer. If you want SPACE to consider a purchase, request the separate free review. No report purchase is required.

Scope limits. A future real report must be signed off by a named reviewer against the accepted evidence set. It is not legal, tax or investment advice, a certified appraisal, a fraud clearance or a promise that anyone will buy. SPACE's commercial interest must remain disclosed.

Evidence trail and useful resources

Internal example evidence: synthetic-receipts.csv (DEMO-001-216); synthetic-track-register.csv (DEMO-A-F); synthetic-document-inventory.csv (D1-D5). Values generated from explicit fictional allocations, not customer files.
Public resources: Current free-review policy · Seller document checklist · Offer checklist.
Next step: request SPACE's existing free review, or speak with an independent adviser. A paid report and a purchase application are separate decisions.
